B. SARANYA

B.E. Computer Science and Engineering | 2nd Year Undergraduate (CGPA: 8.9 / 10.0)

📍 Chennai, Tamil Nadu • 📞 +91 9360994832 • ✉️ saranyabalu2007@gmail.com • 🔗 LinkedIn • 💻 GitHub

Career Objective: Motivated Computer Science and Engineering student with an 8.9 CGPA and strong technical foundations in Java, Python, and Data Structures & Algorithms. Passionate about leveraging artificial intelligence and web development to build accessible, real-world software applications. Seeking software engineering internship opportunities to apply technical skills, problem-solving abilities, and collaborative leadership in a growth-oriented environment.

EDUCATION

Academic Excellence

Rajalakshmi Institute of Technology, Chennai, Tamil Nadu — 2025 – 2029 | 2nd Year

Bachelor of Engineering in Computer Science and Engineering | CGPA: 8.9 / 10.0

Key Coursework: Data Structures & Algorithms, Object-Oriented Programming (Java/Python), Web Technologies, Database Systems.

St. Joseph Matriculation Higher Secondary School, Chengalpattu — Schooling

• Higher Secondary Certificate (12th Grade): **96%** | • Secondary School Leaving Certificate (10th Grade): **97%**

TECHNICAL SKILLS

Languages	**Java**, **Python**
DS & Algorithms	Arrays, Strings, Hashing, Two Pointers, Sliding Window, Prefix Sum, Binary Search
Web Development	Frontend Development (HTML, CSS, JavaScript)
Developer Tools & IDEs	VS Code, Eclipse, GitHub, Git

KEY TECHNICAL PROJECTS

AI & Web Applications

Doctovia AI | AI-Powered Healthcare Assistance Platform — AI / Web

- Engineered an AI-driven healthcare platform designed to simplify medical accessibility and provide instant user assistance.
- Designed responsive and intuitive frontend interfaces to enhance patient-system interactions and platform usability.
- Collaborated on core features emphasizing smooth navigation, quick response times, and user data privacy.

AgroScan AI | AI-Based Agricultural Assistance Platform — Award-Winning

- Built an intelligent solution to assist farmers and agricultural workers in diagnosing and resolving crop challenges.
- Designed and deployed an interactive frontend focused on practical usability for real-world agricultural scenarios.
- Collaborated in a cross-functional team to integrate AI models into a clean, accessible interface.

Civic Sense AI | AI-Based Civic Technology Solution — Civic Tech

- Developed a community-focused AI application aimed at identifying and resolving local civic and safety issues.
- Implemented core frontend features to encourage user engagement and simplify community issue reporting.
- Participated in system testing and interface refinement to ensure reliable platform performance.

Health-connect | Community Health Platform

- Built a React-based health platform with Firebase authentication and cloud data features.
- Developed geolocated disease reporting and an interactive heatmap to visualize community trends.
- Integrated a Gemini-powered symptom assistant and blood-donor board with request-based chat.

Competitive Coding & Achievements

- **SDG Achievement Award Winner:** Honored at Apple Developer Centre hackathon for AgroScan AI.
- **Problem Solving:** 25+ LeetCode & 20+ GFG problems solved in DSA fundamentals.
- **Hackathons:** Active participant in building scalable, impact-driven software solutions.

Leadership & Core Competencies

- **Leadership & Management:** Coordinating team efforts and driving hackathon project delivery.
- **Collaboration & Communication:** Articulate verbal & written technical presentation.
- **Problem Solving & Adaptability:** Quick learner mastering new stacks and algorithms rapidly.

AREAS OF INTEREST

Software Engineering • **Java Development** • **Frontend Development** • **AI-Based Applications** • **Algorithmic Problem Solving**
